

DISPOSABLE FILTERING FACEPIECES

MANDIL FFP2/V COMBI

Mandil, ancient word from arabic meaning the handkerchief used by Bedouins to protect their mouths from the desert sand. The series of disposable filtering facepiece conforms to EN 149:2001+A1:2009. It is a complete range including FFP1, FFP2 and **FFP3** class with or without exhalation valve, some models of which designed with special filtering element against nuisance odour. The multilayer cone facepiece is anatomic, comfortable to skin, and provides a progressive protection. The two-piece-elastic headband assures an even face-contour adhesion.

FEATURES

- Filtering facepiece for protection against solid and liquid aerosols and nuisance odour, in compliance with Class FFP2 of EN 149:2001; low breathing resistance; filtering capacity well above 94% when tested against NaCl; filtering capacity well above 94% when tested against paraffin- oil mist.

COMPONENTS

- Filtering element enclosed between two protective layers;
- special filtering element against nuisance odour;
- exhalation valve;
- two piece elastic headbands;
- adjustable nose clip;
- upper nose sealing lip made of soft synthetic rubber.
- **weight:** approx. 15 g.
- **packaging:** 12 pcs
- **selling unit:** 240 pcs
