

# HALF MASKS

## POLIMASK® 330

Half masks made in one size only fitting all faces, complying with EN 140 and therefore with the local European countries' standards. Equipped with screw in connector EN 148/1 for use with dust, gas, vapour, and combined filters and with breathable air supply systems.

### MAIN FEATURES

- Component materials are not likely to cause allergies or irritations.
- Universal fit with excellent seal (leakage less than 0,05%).
- Low breathing resistance (<1,8 mbar during inhalation, <1,4 mbar during exhalation at a rate of 160 l/min).
- Reduced dead space, well below the maximum allowed.
- Good flame resistance and self extinguishing qualities.
- Quick and easy to don and doff.
- The respirator can be suspended from the neck, ready for use, with the harness unfastened.
- Long lasting, high resistance to ozone attack suitable for exposure to both low and high temperatures, and unaffected by humidity.
- Easy to maintain, clean and disinfect.
- Compatible with the wearing of glasses or goggles.
- Weight: approx. 195 g.

### MAIN COMPONENTS

- Facepiece in synthetic rubber with large inner sealing lip.
- Two piece head harness with one strap split to ensure better adjustment and support on the back of the head, complete with separate adjustable fasteners.
- Screw in attachment manufactured in synthetic resin and conforming to EN 148/1, complete with sealing gasket and inhalation valve.
- Exhalation valve assembly equipped with compensating prechamber.
- Silicone rubber version is also available for better comfort and easy sanitizing.
