

FULL FACE MASKS

C 607 TWIN

EPDM full face mask with a wide field of vision. One size fits all. Complies with EN 136. For use with a couple of dust, gas or combined Sèkur filters Series 200.

MAIN FEATURES

- Materials used are not likely to cause allergies or irritations to the wearer's skin.
- Good adaptability to most faces.
- Leakage less than 0,05% corresponding to a protection factor of over 2000.
- Wide field of vision, in excess of 72% of the natural field of vision and beyond 93% of the overlapped field of vision.
- Excellent demisting system.
- Breathing resistance (1,8 mbar during inhalation and 2,0 mbar during exhalation at a flow rate of 160 l/min) well below standard approval maximum limits.
- Reduced dead space (less than 50% of maximum allowed).
- Excellent voice transmission thanks to the frontal position of the speech diaphragm, which allows utilization of a telephone, walk-talky and public address device.
- Good flame and radiant heat resistance: the mask is self extinguishing and maintains full protective capacity even after very severe test (approved according to DIN 58646/10).
- Standard visor made of high impact resistance polycarbonate resistant to acids, even at high concentrations. Optional: multilayer safety glass visor especially resistant to paints and solvents.
- Quick and easy to don and doff.
- Long storage durability, high resistance to ozone.
- Easy to maintain, clean and sanitize. All components can be disassembled without special tools.
- Compatible with the use of safety helmets.
- Weight: approx. 580 g.
- The C607 TWIN can be fitted only with Sèkur filters Series 200.

MAIN COMPONENTS

- Synthetic rubber face piece with wide internal seal for a tight fit and adjustable fasteners for the attachment of the harness (patented).
- Wide field of vision and distortion free visor made of polycarbonate, with fiberglass reinforced synthetic resin frame, easily replaceable.
- Inner mask with non return valves.
- Threaded connector conforming with European EN 148/1 standard, with speech diaphragm.
- Two exhalation valves with compensating prechambers.
- Five straps elastic harness made of rubber, with quick release buckles.
